Independent Assurance of Molson Coors Brewing Company’s 2019 Environmental, Health and Safety Performance Data

ISAE 3000 Statement

June 2020
The nature of the assurance

This is a report by Corporate Citizenship for the management of Molson Coors. Corporate Citizenship has undertaken limited assurance of selected environmental performance data as described below:

- Total energy use
- Total water usage
- Total waste disposals from major manufacturing facilities
- Waste to landfill from major manufacturing facilities
- Scope 1 greenhouse gas emissions
- Scope 2 greenhouse gas emissions (location based)
- Scope 2 greenhouse gas emissions (market based)
- Scope 3 greenhouse gas emissions from distribution of finished product including transport and warehouses
- Total number of environmental releases
- Lost-time injury frequency rate (contractors and employees)
- Occupational illness frequency rate (employees)

The assurance covers the period from January 1, 2019 to December 31, 2019. Molson Coors is entirely and solely responsible for the production and publication of the data assured, and Corporate Citizenship for its assurance.

The data relates to business operations, which are under MCBC’s operational control. MCBC has operations in Canada, Europe, the United States, and India.

The selected performance data, as stated above, has been prepared by MCBC in accordance with the GRI Principles for Defining Report Quality. The reported GHG emissions have been prepared in accordance with the WRI/WBCSD GHG Corporate Accounting and Reporting Standard (Revised). This relates to direct GHG emissions from mobile and stationary fuel combustion sources (in Scope 1); indirect GHG emissions from purchased electricity, hot water and steam (in Scope 2); and other indirect GHG emissions from downstream transportation and distribution, fuel and energy-related consumption (in Scope 3).

GHG quantification is subject to inherent uncertainty due to factors such as incomplete scientific knowledge about the global warming potential of different GHGs and uncertainty around the models and parameters used in estimating GHG emissions.

This engagement was performed in accordance with the International Standard on Assurance Engagement (ISAE) 3000 (Assurance Engagements other than Audits or Reviews of Historical Financial Information) and the relevant subject-matter specific

Corporate Citizenship has complied with the requirements for independence, professional ethics and quality control as stipulated by ISAE 3000.

Assurance work performed

The assurance work was commissioned in December 2019 and was completed on June 2020. Detailed records were kept of meetings, assurance visits and correspondence relating to the assurance. A team of two, led by an Associate Director, undertook the assurance and commentary process. A Director acted as adviser to the project. The team has a range of professional and technical competencies and experience. For further information please refer to the website www.corporate-citizenship.com.

Corporate Citizenship’s work has involved, but not been limited to, the following elements:

1. In-depth management interviews with key persons responsible for MCBC’s environmental, health and safety performance data in order to understand MCBC’s processes for management, reporting and performance improvement in these areas.
2. A review of internal procedures and guidelines used for data collection and reporting.
3. A ‘virtual site visit’ to the Zagreb brewery, Croatia to observe operations and interrogate site-level data systems related to environmental, health and safety reporting.
4. A review of underlying data sources and substantiating evidence to support this year’s reporting, in order to assess robustness of monitoring and reporting systems.
5. A review of year-on-year environmental performance trends to identify any significant changes in operational eco-efficiency and investigate the reasons behind these trends.
7. A review of group-wide data consolidation and reporting to check for errors or omissions in data analysis, consistency with underlying data sets and reasonableness of reporting.
8. A review of figures included in MCBC’s Environment, Social and Governance (ESG) Report to ensure that the data is reported accurately.

Our experience and independence

Corporate Citizenship is a specialist management consultancy, advising corporations that seek to improve their economic, social and environmental performance around the world and is a leading assuror of corporate responsibility and sustainability reports. We have worked with Molson Coors on corporate responsibility strategy, rankings and standards, stakeholder engagement, and
benchmarking since 2011 and this is our fourth year providing assurance. During the 2020 reporting period, our work with Molson Coors focused on data assurance.

**Conclusion**

Based on the scope of work and assurance procedures performed, nothing has come to our attention that causes us to believe that the sustainability data is not prepared, in all material respects, in accordance with GRI Principles for Defining Report Quality and the WRI/WBCSD GHG Corporate Accounting and Reporting Standard (Revised).
