Thank you for telling us about changes to your VAT registration details.

We confirm that the information you provided is acceptable and we've updated your details on the VAT register, including, if appropriate, any notified change in partners within the business.

If your changes included updates to your VAT Return dates, it's important that you carefully check them. You should submit the current VAT Return, with any payment, by the due date. The first return thereafter is likely to cover a period of either one or two months and may be due earlier. If the approval was for monthly returns, the current VAT Return dates may have been shortened and the return may be due earlier.

If you have our approval to use the Flat Rate Scheme, you should use the scheme from the confirmed start date and take care to choose which business sector percentage applies. If you choose the incorrect sector, you may pay the wrong amount of tax and could later receive an assessment for additional VAT.

Check your online tax account to confirm the updated VAT registration details, including current and subsequent VAT Return dates.

Please tell us straightaway about any changes to the details we currently hold about you for VAT. You can find information about how and when to do this online. Go to www.gov.uk/vat-registration/changes-to-your-details
